

Wireless Load Transmitter & Display

Wireless Load Transmitter Specification

Power Supply

Battery Operated

3.7 VDC (Approx 5000 mAh)

Battery Charging

In built battery charging and monitoring

Charging Adapter

5 V 1 Amp battery charger provided

Load Cell Amplifier

In built 24 bit Delta-Sigma ADC

Transmission Range

50 meters line of sight.

Note: Transmission range varies on environment and setup.

Load Cell Compatibility

Supports all kinds of major load cell

Wireless Display Specification

Power Supply

230 VAC powered device

Features

- The device has inbuilt communication antenna for bi-directional signalling

- On site calibration

Optional Features

- Provision for 1 / 2 Relays

- 0-10 VDC output

- 4-20 mA output

Note: The optional features are available on request.
